***** Attention Budget and Health Care Reporters *****

President, Congress Urged to Make Health Funding a Priority
More than 370 groups advocate for more discretionary spending for public health

WASHINGTON – January 29, 2004 – More than 370 diverse organizations and associations concerned with health issues released a letter to the President and Congress today urging them to invest more money in public health. Specifically, the groups are calling for a 12 percent increase in discretionary funding for “Function 550,” the budget account that finances federal agencies dedicated to disease prevention, medical research, health care delivery, food safety, and training the nation’s and public health workforce.

“The health of all Americans is at risk from an unprecedented range of threats,” the letter stated. “Our nation’s public health system will not be able to respond adequately to these threats without additional resources for the continuum of medical research, prevention, treatment, and training programs.”

Full text of the letter follows. A copy of the letter with signatories is also available online at www.cancer.org/takeaction or www.healthyamericans.org.

###

IT'S TIME TO MAKE PUBLIC HEALTH FUNDING **A NATIONAL PRIORITY**

January 29, 2004

Dear President Bush and Members of Congress:

The health of all Americans is at risk from an unprecedented range of threats, including: chronic diseases and disabilities, infectious and food borne illnesses, biological and chemical terrorism, mental disorders and substance abuse, catastrophic injuries, and a shortage of healthcare providers and trained public health workers.

Our nation's public health system will not be able to respond adequately to these threats without additional resources for the continuum of medical research, prevention, treatment and training programs. We urge you to increase discretionary funding for public health through the Function 550 budget allocation in Fiscal Year 2005 by 12 percent. This investment is critical to improving the health, safety and security of our nation.

Sincerely,

AAHP-HIAA
